

# Live Training Center - Creating Continuous Flow

Date:  
2 Days

Event language:  
Chinese

Qualification for Production Managers, Production Teamleaders, Production Planners, Improvement Managers

**Benefit**  
for your daily business.

**You learn from**  
**top class production experts**

- > successful customer-oriented production strategies
- > implementation of flow-oriented production set-up
- > how benchmark factories work
- > how to start with a sustainable improvement process

**Why that Event?**

China has become too expensive to run a factory without the proven lean-BestPractice. This workshop will help management and team leaders to learn from others with same challenges and to create an own vision of future improvements within their own factory.

Implementing a modern production system which ensures the daily use of proven lean methods and tools. During that benchmarking event you could discuss your problems with our experts and the other participants.

Staufen Live Training Center offers a step-by-step approach of different production concepts (from shopfloor organization to flexible one-piece-flow assembly lines) for all participants. Use these two intensive days with enormous practical experiences to learn modern BestPractice Production tools and methods.
